

MY IMPRESSIONS OF HUNGARY, BUDAPEST

March 2023

We started our way to Budapest on Sunday morning. We arrived in our hotel and it was really beautiful. I also liked the view through the window in our room. In the afternoon we took a look of the city.

The next day after breakfast, which was really good, we went to Szigethalom school. They welcomed us very nicely. We had our presentations. Hungarian students showed us their folk dance and we also had to dance. At first I didn't want to dance, but later I kinda enjoyed it. In my opinion, it was the most funny and interesting day in Budapest.

On Tuesday we went to the dance theatre. We were in many rooms and were told a lot of things about theatre. That was pretty good, but they told us too much and it was boring to keep listening. We went to shopping mall. Later they put us in few groups and we had statue finding. It was so cold and we had to walk a lot to find statues, so I didn't like it.

On Wednesday we drove to Vac. We walked through the town, which I didn't find very interesting. Then we went to gallery. We were also drawing.

On Thursday we went to school again where we had another presentations. Then we drove to Museum of Local History. I was expecting something bigger...it was actually just a house with old things. Later we created our own »coat of arms«. That was more fun.

The last day we packed our things and went a little bit in the city for the last time. Then we went home.

MY IMPRESSIONS

First day in Budapest we learned Hungarian`s folk dance and we also danced. It was very fun.

Second day we went to the dance theatre. There I saw so many beautiful dance costumes and studios. We also saw a royale palace and some pretty church.

On third day we went to another city called Vac. There we went to museum and we were painting.

Forth day went to Szigethalom`s local museum and we played some old games

Fifth also last day we went shopping. I bought very pretty black body. I had a really good time there. I learned some new things and saw some very beautiful architecture.
